# METHODS AND APPARATUS FOR MANAGING DEBUGGING I/O

## ABSTRACT OF THE DISCLOSURE

Methods and apparatus for providing replacement functions for a set of  
10 system services include requesting a primitive function from one of the set of  
system services, the primitive function replicating the one of the set of system  
services with reduced functionality. A reference to the requested primitive  
function is then sent from the one of the set of system services.
